

## Project Design Phase-II Technology Stack (Architecture & Stack)

|               |                                   |
|---------------|-----------------------------------|
| Date          | 13 October 2022                   |
| Team ID       | PNT2022TMID40957                  |
| Project Name  | Project –Plasma Donor Application |
| Maximum Marks | 4 Marks                           |

### Technical Architecture:

**Table-1 : Components & Technologies:**

| S.No | Component                               | Description  | Technology   |
|------|---|--|--|
| 1.   | User Interface                          | How user interacts with application.<br>Web UI, Mobile App, Chatbot etc.   | HTML, CSS, JavaScript, Python, Flask                           |
| 2.   | Register to website                     | The user can able to register in website and fill their details. The user details are Stored in IBM DB2 securely.                      | Flask app using Kubernetes cluster, IBM DB2.                   |
| 3.   | Login to website                        | The user interact with the website to login into account. The user details are verified by comparing it with details stored in IBM DB2 | Flask app using Kubernetes cluster, IBM DB2.                   |
| 4.   | Request for Donor/Register for donating | The user interact with the website to request for plasma Donor/register for willing to donate plasma.                                  | Flask app using Kubernetes cluster, IBM DB2.                   |
| 5.   | Upload proof in website                 | The user can able to upload the vaccination certificate and other proofs.  | Container registry,  |
| 6.   | Cloud Database                          | Database Service on Cloud  | IBM DB2, IBM Cloudant etc.                                     |
| 7.   | File Storage                            | File storage requirements  | IBM Block Storage or Other Storage Service or Local Filesystem |
| 8.   | External API-1 (Email Alert)            | To send email alerts to donor when a person requesting Plasma Donor.   | SendGrid.  |
| 9.   | Machine Learning Model                  | Machine Learning Model can be used for Chatbot.  | IBM Watson.  |
| 10.  | Infrastructure (Server / Cloud)         | Application Deployment on Local System / Cloud   | Local, Cloud Foundry, Kubernetes.                              |

**Table-2: Application Characteristics:**

| <b>S.No</b> | <b>Characteristics</b>   | <b>Description</b>  | <b>Technology</b>          |
|-------------|--------------------------|---|----------------------------|
| 1.          | Open-Source Frameworks   | Flask is an open source framework in python. Similarly Docker is also used.   | Flask , Docker             |
| 2.          | Security Implementations | Only registered users who have specific privileges has access to the website. | IBM DB2                    |
| 3.          | Scalable Architecture    | 3 – tier architecture, presentation tier, application tier, data tier         | Python, IBM cloud services |
| 4.          | Availability             | The application can be available for user at any time.                        | Kubernetes, Docker         |
| 5.          | Performance              | The application can handle multiple requests per second.                      | Kubernetes cluster, IBM    |
